NEW Giesta AirFlow

A PERFECT SOLUTION for your own comfort with minimal design

High performance wooden pattern steel door Giesta AirFlow series with integrated airflow window and insect screen is perfect combination that keeps design and housing comfort at heart. Giesta AirFlow allows air inside your house to circulate in and out all day to cool the living space, reduce humidity, remove unpleasant odor for serene ambience.

Invented to truly create soothing ambience and adding comfort to your home. Let the wind flow into the living space by opening ventilation panel without worrying as the airflow panel is wide enough to let the air flow in easily and too small to be entered from.

Raising security to another level with multi-lock function to lock and unlock by single lock at handle but securely lock 2 positions. Giesta AirFlow is Japanese Industrial Standards (JIS) certified and guaranteed with Japan's KIDS Design Award for its user-friendly and child safety design.

TOSTEM AIRFLOW SLOT

Tostem AirFlow Slot designed to truly boost living space ventilation performance as when opened, fresh air can flow in and reduce room's temperature in daytime and when closed, dust and odor from outside is blocked to enter the living space. Insect screen will prevent insect and small animal to enter. The screen is detachable for cleaning and comes with minimal modern design, easy to operate smoothly and designed to combine with any window design in **WE Plus** and **WE 70** series.

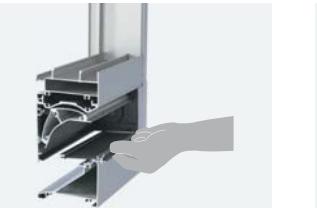

Inside view- Open

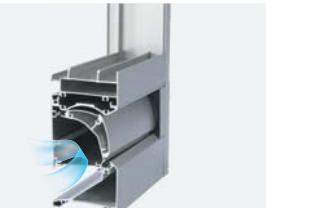

Inside view- Close

Bearing for easy open/close operation

Detachable insect screen
for cleaning

(When closed) JIS A-3 Airtight
performance certified, dust blocking

TOSTEM AIRFLOW DOOR

Designed to create air ventilation using immense vertical sliding panel that function smoothly even when the door is locked, sliding without effort and the panel can be in partial/fully open position.

- Fully closed position when ventilation is not required
- Fully opened position for maximum airflow in daytime or to ventilate cooking odor and smoke
- Partially opened and locked to prevent unlocking from outside while keeping the living space cool when no one home

Security grill and insect screen
